ROWE VarioFold Compact Online – Online Folding at Offline Prices

Niederdreisbach/Düsseldorf May 31, 2016 With the VarioFold Compact launch in 2015 ROWE presented the first offline folding system worldwide that can be extended to an online folding system with minimum outlay, even after it has already been put into operation. At this year's drupa the specialist in wide format is now presenting the online solution for the VarioFold Compact. This very reasonably priced online folding system is compatible with any standard wide format printer. Using the PREMIUM MANUAL FEED means the VarioFold Compact remains a complete offline folding system even in the online configuration.

The VarioFold Compact offers its users maximum security for their investment. Thus customers have a choice: they can start directly with the online version or they can extend an already installed VarioFold Compact Offline to the online version with minimum outlay – patented.

Using an online bridge the VarioFold Compact can be connected to any standard large format printer. Due to its modular design users can configure a folding system to meet their specific requirements. Depending on the folding volume, they have the choice between three different delivery trays for folded documents. For the application of individual folding programs, e.g. folding of maps, ROWE offers various Apps and Kits. A special highlight here is the patented endless folding without any unfolded pages in-between.

Compatible with any standard wide format printer

Using the Online Bridge 1 or Online Bridge 2 the VarioFold Compact can be connected to any standard large format printer. In online operation the VarioFold Compact is controlled via the Connection Kit.

VarioFold Compact Online is as economical as any standard offline folding system

Revolutionary: online folding is financially viable for everyone, thanks to ROWE. Modular construction means the VarioFold Compact isn't more expensive than normal offline folding machines.

Two folding systems in one thanks to PREMIUM MANUAL FEED

Even in the online configuration the VarioFold Compact remains a complete offline folding system. Clever: due to the PREMIUM MANUAL FEED documents from other large format printers are also conveniently folded.

Suitable for small spaces

The VarioFold Compact means limited space availability is no argument against online folding systems. This is because the VarioFold Compact requires minimal space. The VarioFold Compact Online is now available.
